## Popular Subscription FUND.

To Carry on the Work of the  
Y. M. C. A. of D. C.

The directors of the above named  
association have secured the build-  
ing formerly known as the "Forest  
City House" 1607-9 11th st., n. w.  
They have fitted it up for the  
use of the members, who are intitled  
to the following privileges:

A reading room where files of  
the leading religious and secular  
papers, magazines and reviews  
may be found; a miscellaneous  
library of four hundred volumes,  
and a pleasant and home like par-  
lor for social gatherings, religious  
talks and lectures.

The work on the gymnasium and  
bath rooms is being pushed rap-  
idly forward, and will be complet-  
ed in the near future. In order that  
we may be enabled to meet the  
heavy obligations under which we  
are placed and to extend the work  
to a great degree of usefulness we  
have devised the following plan by  
which we appeal to all persons  
having the welfare of young men at  
heart for help.

The city has been divided into  
thirty districts, and each district  
will be placed in the hands of a su-  
pervisor who will appoint as many  
solicitors as he may need to do the  
work in his district. It is believed  
that in this way every person in  
the district will be given the ex-  
cited opportunity of helping a worthy  
cause.

We ask for the small sum of one  
dollar in cash from each person for  
which we will give a certificate re-  
ceipt. Solicitor will show due au-  
thority from the president and  
general sec'y, with the seal of the  
association affixed thereto, to be sure  
to pay money only to such author-  
ized agents who will take pleasure  
in producing the required evi-  
dence.

### A "FLYER, INDEED"

THE FASTEST SCHEDULED TRAIN  
AMERICA RUNS FROM PHILADEL-  
PHIA TO THE SEA VIA READ-  
ING ROYAL ROUTE.

That there is a streak of "sporting  
blood" in the veins of the most a-  
dventurous and in the universal  
love of speed in railway speeds and  
the delight with which the average man  
hails each successive triumph of the loco-  
motive over the combined elements of  
time and distance.

The much-vaunted "Flying Scotch-  
man" express train between London and  
Edinburgh, in Great Britain, is still re-  
garded by many persons as the fastest  
regularly scheduled train in the world.

This, however, is a mistake, the speed of  
the "Scotchman" having been exceeded  
by several railroads in this country, no-  
tably by the New York Central, whose  
"Empire State Express" between New  
York and Buffalo has, until within a few  
days, claimed the title of the fastest  
regular train in the world. This celebra-  
ted train runs from New York to Buffalo,  
a distance of 440 miles, in eight hours and  
forty minutes, which is at the rate of  
seventy-one seconds to each mile, or fifty  
and two-tenths miles per hour. Deduct-  
ing all stops the average running time of  
this train is fifty-two and two-tenths  
minutes per hour.

Now, however, comes a new claimant for  
high speed honors. It has been discov-  
ered that the Reading Railroad's 33 1/2 p. m.  
train from Philadelphia to Atlantic  
City, known as the "Seventy Minute  
Flyer," is actually the fastest regularly  
scheduled passenger train in the world.  
The distance from Chestnut street wharf  
to the Camden terminus of the railroad is  
about a mile and a half, and the  
train makes the trip in twenty minutes.  
This leaves sixty minutes for the  
thirty-five and a half miles which inter-  
vene between the Camden depot and the  
station at Atlantic City. A little figuring  
will show that this is a speed of sixty-  
five seconds to the mile, or the rate of  
fifty-five and a half miles per hour, best-  
ing the former record six seconds per  
mile, and almost five miles per hour.

It should be understood that this refers to  
the speed of regularly scheduled trains  
over the entire length of their scheduled  
runs, and not to mere phenomenal bursts  
of speed or stretches of fast running to  
make up for lost time or delays. The  
rate of fifty-five and a half miles is ex-  
ceeded every day on the Reading Rail-  
road, and possibly on no other line,  
but on no railroad in the world, so far  
as known, is there a train run from end  
to end of its route at so great an average  
speed as that of the "Seventy Minute  
Flyer."

When the latter was established it was  
not with the purpose of breaking a record,  
but the officials were confident of their  
ability to run a train safely and promptly  
in the specified time or less if required.  
It was determined, however, to limit the  
train to six cars to insure quickness. This  
was found to be impracticable, and for  
more than a week the train has been  
carrying eight cars, including one or more  
heavy Pullmans, and making schedule  
time on every trip.

President McLeod can now congrat-  
ulate himself that his road holds the  
"world's record" for the fastest mile (3 1/2  
4.5 seconds, as timed August 27, 1891, by  
President McLeod, Mr. William S. Slinger,  
of the Philadelphia Record, and others),  
and also has upon its time table the fast-  
est regular train in the world.
